Dear Madam/Sir,

RE: A LETTER OF THANKS GIVING AND APPRECIATION ON THE RECEPTION AND CONTINUOUS USE OF
READ INTERNATIONAL BOOKS

Happy Christmas and a Happy New Year,

On behalf of Mbamba Bay Community including the school board, staff members, students and parents at large I land onto your shoulders words of greetings, appreciation and thanks giving.

We all naturally are happy to earn the good books from your organisation. These books are current, applicable, standard and useful.

They cover the basic subject and normally ease the teaching and learning process. They cement the academic discipline. They normally keep students busy all at once. Their pictures do touch readers eyes and eventually their mind. The tune readers' minds into the scientific environment or atmosphere.

We have set aside a room – book store – where we want to develop bookshelves so that they can easily be accessible and can last long. These books will have their cards soon so the use of a catalogue will rescue time of searching. My observation to readers especially students – I see most of them being influenced by the books – they may learn even by looking at their pictures and a high discipline of library is insisted.

Concerning feedback on relevance of these books – in fact the syllabus in Tanzania is intertwined with the same topics as in these books. Minor variations do not go very far from the book topics. Still we are making analysis and we will send you details of relevance after some time.

The whole school community is reacting positively towards these books.

In a sentence we can say your organisation has quenched our thirst by bringing us these books.

On behalf of the school community I give genuine thanks to you in person for writing us, and organisationally for bringing us these good books.

Yours sincerely,

AMADEO HL MAPUNDA
