- Any other medical dictionaries
- Where There is No Doctor: Village Health Care Handbook for Africa by David Werner, Carol Thuman, Jane Maxwell, and Andrew Pearson
- Where There is No Doctor: Village Health Care Handbook by David Werner

READ Campus 'Medical' Book Drive

Accessing healthcare is something we can sometimes take for granted here in the UK. We have access to innumerable medical books, journals and cutting edge research information; however tens of thousands of people die every day from diseases that are readily preventable and treatable. The donation of medical textbooks is an easy and effective way to help promote health education and autonomy in resource limited settings.

As part of a pioneering new project to address this issue READ International together with The Laura Case Trust and MedSin have launched a new medical textbook drive! We are looking to collect medical textbooks from a specific list created with the input from the dean of the medical school and medical students in Dar es Salaam, Tanzania. The books will be distributed using READ International's network to medical schools in Tanzania, where the curriculum is taught in English. We are looking to collect books that are not more than 5 years old and in reasonably good condition.

So if you have any books from our list that you no longer need, or if your medical school and hospital libraries are clearing and renewing their stock, please get involved and donate your, or your local library's, books to this cause!

The success of this project depends entirely on your help and support so please get involved, get in touch and good luck!
